

Schedule Builder Profiles and You

Why is it “Invalid Name” ?

Plan Name

Save

Saving your schedule

- Type a name in the plan name text box, and
 - Press the enter / return key to save
 - Press the “Save” button at the end of the text box
- Press CTRL + S, and type the plan name in the popup

Plan names can only contain A-Z, a-z, 0-9, -, and spaces, if an invalid character is in the name, it will be saved as “Invalid Name”

An empty name will be saved as “unnamed”

Using plans

The plan will be saved, and you can now delete, load, update, rename, copy, and get info about the plan.

Shown below is an example of a saved plan with the name “No Wednesday”

No Wednesday      

**Clear Current
Schedule**

-Clear the open
schedule.

*I know this is already in the schedule builder,
but this is better!*

**Clear All Saved
Schedules**

- Clear all data

*You need to type “NJIT” to avoid accidental
clicks*

Buttons and their functions

Delete - Remove the plan

Load - Clear the current schedule and
open the saved schedule

Update - Save the open schedule on top
of this plan

Rename - Change the name of the plan

Copy - Copy the code for loading the
schedule in the load section

Info - Get information on what courses
are in the plan and their CRN's

Load Save From Code

Import

Using a copied code.

To use the copy code, paste the code into the
load text box, and

- Press enter / return to Import
- Press the “Import” button at the end
of the text box
